

Work more efficiently, make informed recommendations,
and optimize your crop consulting business.

Supercharge your crop consulting business with digital tools designed to help you get more done.

FarmQA provides nuts-n-bolts digital tools for agronomists and other agribusiness professionals, making your work easier and more efficient.

It includes a user-friendly mobile app and a web platform that gather crucial information from various sources like:

NDVI
Imagery

Weather
Data

Soil
Labs

Scouting
Insights

Yield
Results

And turns it into a data-driven, decision-making powerhouse.

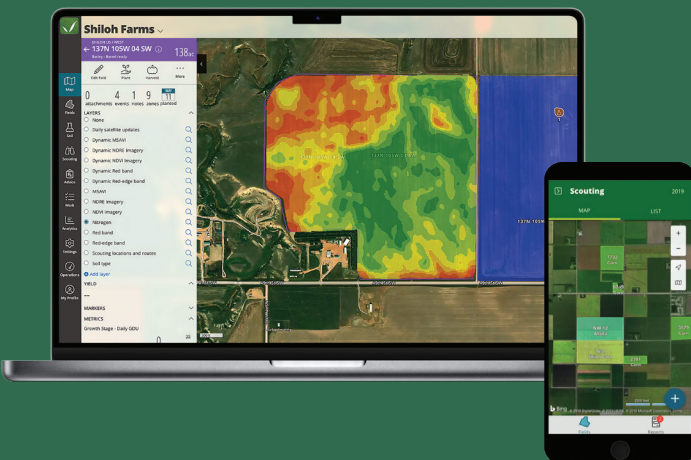

With FarmQA, you'll have a clear picture of crop conditions and soil health. This helps you provide more accurate recommendations, make more informed decisions, and help your customers deploy resources wisely. It's like having superpowers as a consultant, enabling you to provide top-notch services to growers in today's digital world of agronomy.

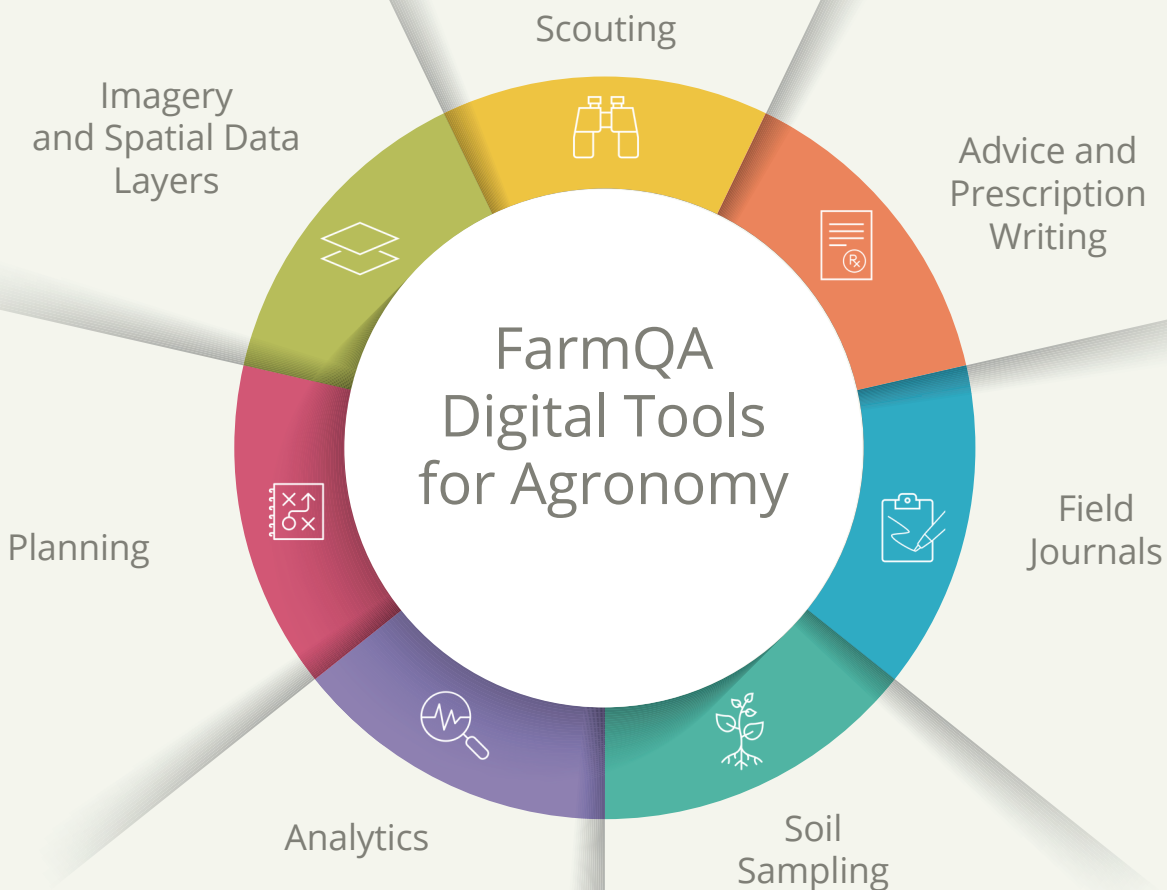

Crop Planning

Plan your field and crop planting with unique planning tools including shopping lists, recommendations, and workflow. See your previous seasons' planting records and plan your next season, all in one place.

Mobile Crop and Field Scouting

Keep track of developments such as pest, disease, and weed infestations, along with growth stages, and the overall health of the crops you manage. Effortlessly text professional reports to individuals or groups for immediate viewing.

Soil Sampling and Fertility

Provide precision soil sampling and more efficient agriculture services. Schedule and assign spring and fall sampling tasks, track your progress, and see the results — all in a single tool.

Management Zones and Prescriptions

Use the datasets you care about to create custom managements zones that quickly convert into prescriptions for any application type, helping your growers increase productivity, maximize applications, and even reduce costs.

Grower Engagement

Gain a near real-time way to efficiently stay up-to-date on what is happening in the fields you manage including planting and spraying records, ensuring any adjustments made or tasks completed are instantly shared between you and your grower.

Record-Keeping and Analysis

See all aspects of an operation in a single view including fields, scouting reports, weather stations, and more. Understand the impact of weather, disease, pests, and the effect of agronomy recommendations. Analyze, adjust, and manage your agribusiness more effectively.

The Best Endorsement: Satisfied Customers

FarmQA has greatly improved the quality of the information I provide my growers and the speed with which I can deliver it.

—AARON
All-Terrain Ag Management | Texas

I can organize the information in a way that aligns with my workflow and field operations... without compromising on the end result.

—ROBERT
Boyd's Farm Supply | Ontario

FarmQA has taken our company to the next level of what our customers are looking for.

—RYAN
Advanced Crop Care | Illinois
