farmQA

Take Control of Soil Health

FarmQA makes soil sampling efficient and accurate.

Plan your sample locations, track progress, and see the results – all in a single, easy-to-use tool.

1. Create sampling plan
Define or upload zones and grids as KML/KMZ, GeoTiff or shapefiles, or follow a composite sampling method.
2. Define locations
Locate the field by map or list, navigate to sampling location, and mark each sampling point by dropping a pin and scanning the sample bar code. Markers ensure sample locations are repeatable for precision sampling.

3. Import and analyze results
Use API scan or manually upload results into FarmQA to create a digital library of all soil conditions. Compare across fields, crops, and growing seasons.

Pinpoint Sample Locations with Precision

- Easily collect and manage field boundaries and sampling points through the mobile app

- Robust support for grid, zone, and composite sampling plans

- Navigate seamlessly with both internal and external GPS

- Operate and access data with or without an internet connection, ensuring continuous workflow

- Enable consistent testing at the same points year after year for precise results
Import and analyze results

- Automatically import AgVise Labs soil test results
- View soil test results as layers
- Store soil test reports digitally for easy access
- Build a comprehensive library of historical soil data
- Identify nutrient trends, patterns, and variations over time

Create zones and write fertility recommendations

- Analyze soil test results for nutrient levels, pH, and organic matter
- Create custom managements zones that quickly convert into variable rate prescriptions for any application type
- Share with your clients via PDF or shapefile export

Manage tasks and teams

- Assign tasks to team members for effective coordination and dispatch
- Assign sampling tasks directly on your mobile device
- View completed and outstanding tasks for real-time progress updates
- Reassign or distribute tasks for balanced workloads

Download the mobile app or get the full soil health experience using the web application free trial on FarmQA.com.
